+351 966 148 044

Covilhã, Portugal

pedrosilvestre.dev

Skills

Programming languages

TypeScript, JavaScript, HTML, CSS

Frameworks & Libraries

Lit, React, Vue 3, Angular, Vuetify, Redux, Pinia

Backend

Node.js, Express.js

Testing & Practices

Jasmine, Unit Testing, Mocha/Chai, Mockoon, Agile Scrum, JIRA, Confluence, CI/CD, GitHub, Bitbucket

Build tools

Vite, Rollup

AI tools

Cline, Claude

Soft skills

Teamwork, Adaptability, Problem solving, Quick learner, Communication

Hobbies

Videogames

Music

Livestreams

Travel

Technology

Movies & Series

Languages

Portuguese

Native

English

Fluent

Frontend Developer with 7 years of experience building user-friendly web applications. I work mainly with TypeScript, JavaScript, SCSS, and HTML, and I'm comfortable across several frameworks, including Lit, React, Vue, and Angular. I enjoy turning design concepts into clean, maintainable code and working with cross-functional teams to ship solutions on time. I like picking up new technologies and keeping the focus on a solid user experience.

Education

UNIVERSIDADE DA BEIRA INTERIOR

Bachelor's Degree

Computer Science / Software Engineering

Covilhã, Portugal • Oct 2012 - Feb 2018

Experience

Softinsa - IBM

Fundão, Portugal

Frontend Developer (Full-Time)

May 2022 - May 2026

Frontend developer delivering web applications for client projects across various industries within Agile Scrum teams. See the Projects section for client work delivered during this role.

Capgemini Engineering

Fundão, Portugal

Jr Frontend Developer (Full-Time)

May 2019 - Apr 2022

Frontend developer delivering web applications for client projects across various industries within Agile Scrum teams. See the Projects section for client work delivered during this role.

Projects

Is it Cancelled?

Created a website as a personal project, where users can find if a show they want to watch has been cancelled or is still running.

- Made with React and Typescript.
- Assistance from AI tools such as Claude code and Claude design.
- Used Tanstack Query for API calls. Utilized TMDB API library as source of information.
- Deployed website using Vercel.

Curriculum Vitae

Created a personal website to display my CV.

- Made with React and JavaScript, utilizing the Context API for state management.
- Assistance of AI tools such as Claude.
- Deployed website using Vercel.

Public Contracts Platform

Sept 2025 - May 2026

Web application for managing public contracts and documents, delivered within an Agile Scrum team using AI tools such as Cline and Claude to speed up development.

- Led the frontend development, built with Vue 3, Vuetify, and TypeScript.
- Worked alongside a UX/UI designer to translate their Figma design system into the frontend.
- Contributed to the backend (Java, Spring Boot, and PostgreSQL), gaining full-stack experience.

BMW & MINI Sales Widgets and Cockpit

Nov 2022 - Sept 2025

A web components library and a full-stack web application built with the Lit framework and TypeScript.

- Built a web components library that powered widgets on the sales websites for BMW and MINI.
- Contributed to a cockpit application that used these components as a tool for sales agents and as a testing ground for widgets before they went live.
- Built the cockpit with Lit on the frontend and Node.js with Express.js on the backend, where Express also served as a proxy for all widget requests.
- Worked in an Agile Scrum team in close contact with both the development team and the client, including occasional travel to the client's site for planning sessions and team-building.

Global Via Toll Payments Platform

May 2022 - Jul 2022

Web application that lets users manage toll payments and access related services.

- Used React and TypeScript to implement scalable micro-frontends.
- Improved both application performance and the user experience.

Volkswagen Infotainment Apps

Jul 2020 - May 2022

Two web applications (Apple Music and Spotify integrations) for Volkswagen's infotainment system.

- Built the applications using Angular, TypeScript, and Jasmine for unit testing.
- Worked in an Agile Scrum team, coordinating closely with an external backend team and a separate UI/UX design team.

Consultant Management Tool

Jan 2020 - Mar 2020

Internal web application for managing consultant assignments and tracking performance.

- Designed and built the tool using React and TypeScript.
- Streamlined day-to-day operations and reduced administrative time by around 20%.
